Art Unit: 2837

1. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitations "the slot having a dimension larger than a diameter of a string" in amended claim 1, and "the slot is in communication with the aperture and has a dimension larger than a diameter of the string" in amended claim 4 are considered new matter because the limitations are neither described in the specification nor shown in the drawings.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Paxton (3,595,118).

Regarding claim 7, Walker discloses the claimed invention except the aperture having a dimension configured to receive an item larger than a diameter of a string.

Paxton teaches a pick having an aperture having a dimension larger than a diameter of a string (Figs. 1-5) for resisting rotation of the pick between the thumb and

finger (abstract). It would have been obvious to one having ordinary skill in the art to modify Walker as taught by Paxton to include the aperture having a dimension configured to receive an item larger than a diameter of a string for the purpose of resisting rotation of the pick between the thumb and finger.

Regarding claim 8, Walker discloses the claimed invention.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Carpenter et al. (1,254,577).

Walker discloses the claimed invention except a gripping feature configured on the planar body.

Carpenter et al. teach a pick having a gripping feature (2) configured on the planar body (1) for providing a gripping surfaces. It would have been obvious to one having ordinary skill in the art to modify Walker's pick as taught by Carpenter et al. to include a gripping feature configured on the planar body for the purpose of providing a gripping surfaces.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Nappi can be reached on 571-272-2071. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
